OpenAI

Open.AI-GH: Is taking a text as an input and translates it to grasshopper visual script , without needing to redo or program script that are repetitive and complex at the same time.

Suggested costumer segmentation :

1. Designer

2. Researcher

3. Architect

4. Computational designer

5. Structural designer

Demo

Our Research :

Is focused in embedding visual scripting languages into Open AI to generate visual script codes from description text and that will help designers to speed forward their parametric design without needing to learn visual scripting.

Projected product:

1. OpenAI–GH Supported for (Grasshopper / Rhinoceros)
2. OpenAI-Dynamo Supported for (Revit)
3. OpenAI-BP Supported for (Unreal Engine)
