Venture with us in the vast technology that we experience.

CALI TECHNOLOGY SOLUTIONS

CALI
TECHNOLOGY SOLUTIONS

Introduction

Cali Technology Solutions is a platform that brings together all the cutting-edge technologies fueled by Web 3.0 and artificial intelligence to transform creativity into innovations. To automate repetitive activities and preserve time/power consumption, we specialize in integrating engineering solutions with artificial intelligence. With the help of Raytracing Technology, we specialize in transforming reality into other universes (VR/AR/MR/XR) while sustaining realism.
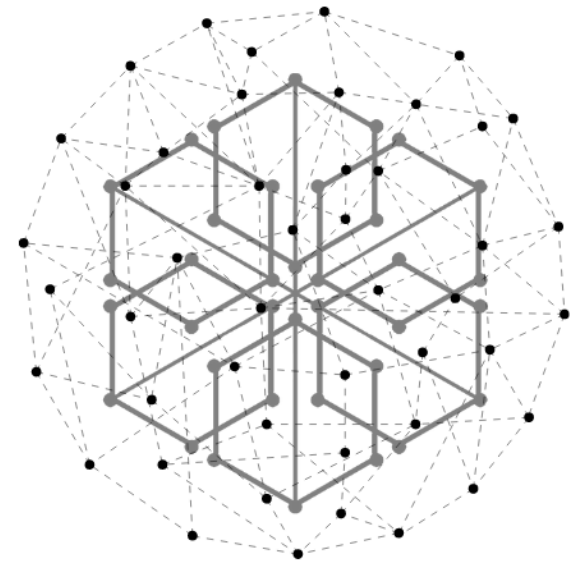

Goals

1st Goal:

Developing an outstanding AI-empowered real state, urban planning & Metaverse Solutions.

2nd Goal:

Continue on improving our AI Empowered BIM.AI: BIM system (Spider) specialized in generative design Automation & Structural analysis.

3rd Goal:

Develop our AI-empowered ERP to service the broader economic sector and shift to a standard branded version that talks about the different needs of businesses.
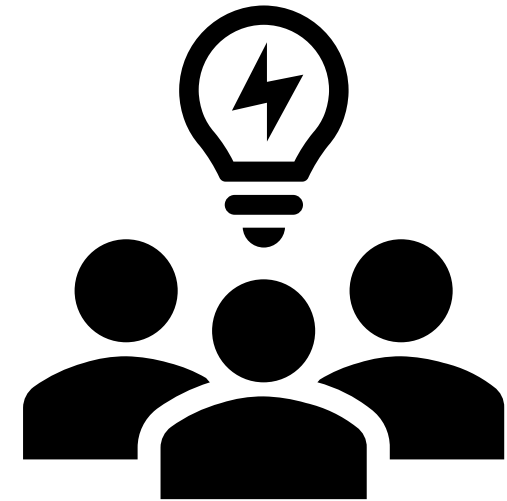

4th Goal

Using Advanced Visualization Rendering to level up the realism in alternative realities (VR/AR/MR/XR).

Vision

To be the most prominent Virtual Technology Firm in The **MENA** region extending services to transformative business sectors.

2022

Establishment
The company was established and the Visual Render Studio department was opened.

Business Incubation
The company was incubated by the Crown Prince Foundation (THE CORE) and the artificial intelligence department was opened.

Türkiye
The decision to go to Türkiye to expand the scope and take more experiences and the Research And Development (R & D) department was opened.

Present
Expanded and there is a large number of customers and the number of departments has increased:

AI – Robotics

Research And Development
